An Open Letter to Chairman Jack Angley

From: Rod Forrester, A proud member of FixCarver.Com

Over 200 years ago we lived under the rule of a Tyrant King who denied all of us our basic God given human rights. It took an armed revolution to send him the message that we will be in charge of our own destiny. We gave ourselves two living breathing documents known as The US Constitution & the Bill of Rights. We as a people are now being faced with the eroding of these rights with the taking away of freedom of speech. You may say you are not and have no part in this but you do, and you may think what are we going to do about it? Well, I will tell it won't be an armed revolution, but it will be the good citizens of this town that will stand up and speak out about the injustice and corruption that exists and is ongoing and we will not give up the struggle. We will continue to inform our fellow citizens of the truth of the goings on in this great town, and our living breathing Constitution and Bill of Rights will prevail.

God Bless the United States of America
