Thank you

Thank you Mr. Casey for lying to us about the \$2.00 dump sticker increase. I like the way you stuck to your story that it was driven by the cost of the adhesive even though the adhesive increase was less than a penny, Thank you Mr. LaFond for lying to the citizens of Carver about Jack Hunters resignation letter. The fact that the letter surfaced and was addressed to you personally did not alter your story. Most of all thank you Mr. LaFond for taking Hunter back when his job elsewhere fell through. I think it's poetic justice that he's still here to explain residential betterments that he promised would never happen. Thank you Mr. Ward and Liz Sorrell for cheating us out of our votes on the school project. We were so confused that we voted the same way the second time and now you want yet another vote. I'm really not confused I know cheaters when I see one and so does the ethics commission (right Liz). One does not serve their community through backroom deals, cheating and lying. If these were the qualities of statesmanship Richard Nixon's birthday would be a national holiday and Slick Willie would have his puss on the dollar bill in place of George Washington. Our heroes aspire to be better. Remember that the nameless fools that hide behind screen names include more than a few of your comrades and I cannot help but point out that you failed to sign your post. What does that say about you?
