FIXCARVER SAVES TAXPAYERS ANOTHER \$300,000

The Carver Reporter quotes Superintendent Liz Sorrell as “We are asking Capital Outlay to borrow the money under the levy limit.” Translate that to mean the people of Fixcarver.com saved the taxpayers a \$300,000 prop 2 ½ override. That’s right without us and our 1064 no votes on Oct 17th we’d be increasing taxes by over one quarter of a million dollars to fund the septic rebuild. Next you will be hearing that the septic system will not cost nearly what Superintendent Sorrell estimated and that Mike O’donnell was correct.

Next we are going to force them to fund the Schematic Design using existing funds as well. Fixcarver.com has obtained the current balances in town money available for use in paying for the Schematic Design portion of the project and we will show how we can fund this without an override as well.

Stabilization Balance \$939,865.05

Reserve Fund Balance \$118,465.00

School Extraordinary Maintenance \$ 19,774.59

Available funds \$1,078,074.62

Less Schematic Design \$ 600,000.00

Money left After Schematic Design \$ 478,074.62

The Financial wizards at 108 Main Street neglected to tell you that they do not need an override. They found the money for the septic system repair once the voters refused a tax increase. They have the money for the design drawings. We must refuse a tax increase again on Jan 19th in order to force them to use existing funds. Is there a better use for this money? They have more money left than credibility. Why vote a tax increase? Even proponents of the schools must admit it’s just plain dumb to increase taxes with money in the bank. Continue to vote NO. Common sense is on the side
