Windfall To Be Squandered by Schools

The School Committee announced Monday night that they intend to throw away the NStar money on RAISES and other ongoing expenses. Rick LaFond told the School Committee that their cut of the Nstar windfall is \$477,000. Mayor Lafond and Superintendent Sorrell have yet to consult with the people of Carver regarding the misuse of our money. The School Committee would rather waste this money within the present budget than work toward a funding the Elementary schools refurbishment without a tax increase. The school rebuild project was the top priority last year but committee member Al Spicer defended the indefensible tonight. Now raises for the teachers are more important than our children. In another revelation Superintendent Sorrell revealed that she is working with the MSBA to resurrect the building project. Fixcarver has heard rumors that Selectmen Ward is working to put a measure on the ballot this August. Do you still wonder why our Selectmen are depicted as Mullahs.
